

I am an NAACP member. These are thoughts to reinforce your efforts:

TANF (CT) should be extended because the pandemic has been particularly hard on Black working mothers (both in terms of health and work) and the pandemic will continue. Black mothers, very often in blue collar jobs, can't work from home and also must take care of children. Black mothers' circumstances are made worse when they might be single mothers and can't afford childcare. An extension of TANF could give them some relief, some breathing space.
